RANA EHAB HAMADAH

SOFTWARE ENGINEER | FLUTTER | LARAVEL | ODOO ERP

Jeddah, Saudi Arabia (Open to Remote / Hybrid) | +966 54 270 9910 | ranaehabhamadah@gmail.com
linkedin.com/in/ranaehab/ | github.com/Rana2E | rana-portfolio-nine.vercel.app

PROFESSIONAL SUMMARY

Software Engineer specializing in Flutter mobile development, Laravel full-stack systems, and Odoo ERP customization. Experience includes delivering features for an App Store-published university social app, independently building a four-role Laravel service platform with online payments, and translating stakeholder requirements into Odoo registration and CRM workflows.

TECHNICAL SKILLS

Core Stack: Flutter/Dart, Laravel/PHP, MySQL, Odoo (Studio, QWeb, Automated Actions)
Mobile & Integration: REST API integration, WebSockets, authentication, Android debugging, Arabic/RTL UI
Additional Development: JavaScript, TypeScript, React, Next.js, Angular, HTML/CSS, Tailwind CSS, Bootstrap, PostgreSQL, Python (Odoo models)
Tools & Workflow: Git/GitHub, pull requests, code reviews, GitHub Actions (CI/CD), Docker, Postman, Figma, Jira, requirements documentation

PROFESSIONAL EXPERIENCE

Odoo Developer (Contract)
Jun 2026 – Present
Madinah Institute for Leadership & Entrepreneurship (MILE)

- Analyze training-program workflows, gather stakeholder needs, and document requirements for Odoo website, registration, and operational improvements.
- Develop reusable Odoo Events registration pages and QWeb templates using HTML, CSS, JavaScript, and Studio; configure tickets, attendee forms, products, pricing, and discounts.
- Automate Events-to-CRM processes using Automated Actions to match registrants with Contacts, create CRM leads, and resolve registration and customer-data issues.
- Configure email marketing campaigns, registration confirmations, and communication templates; assess options for delivering eLearning videos for training programs.

Co-Founder & Flutter Engineer
Jun 2025 – Sep 2026
UniTok | University Social Media Platform | App Store

- Developed Flutter/Dart features for a published university social media app, including profiles, feed, Programs listings, and post interactions.
- Integrated authentication and REST APIs, real-time chat through WebSockets, and camera access with device permissions.
- Diagnosed Android-specific feed rendering, scrolling, and chat issues; fixed Arabic text rendering and RTL interface defects.
- Built the initial Angular website; collaborated via Git branches, pull requests, code reviews, and Jira.

Full-Stack Web Developer (Freelance)
Oct 2025 – May 2026
Postgraduate Research Services Platform

- Built and deployed a Laravel/PHP and MySQL platform for postgraduate research services, with authentication, role-based access, and four interfaces for admins, supervisors, staff, and customers.
- Implemented document uploads and management, email notifications, and activity logs; integrated payment processing through Moyasar and Tamara.

ERP Systems Trainee
Jun 2025 – Aug 2025
iLines Solutions | Riyadh, Saudi Arabia

- Built an Odoo module using Python models, relational fields, XML views, and access rules; configured a local development environment with Docker and Ubuntu.

EDUCATION

B.S. in Software Engineering | University of Prince Mugrin, Madinah | Aug 2025
GPA: 3.76/4.00 | First Class Honors | Full Abu Ghazalah Scholarship
