EDUCATION

Medina, KSA	University of Prince Mugrin Bin Abdulaziz	Jan 2021 – Aug 2025
• B.S.E. in Software Engineering, August 2025. GPA: 3.76/4 • Graduated with First Class Honors. • Earned the (100%) full scholarship granted by Abu Ghazalah.		

EMPLOYMENT

Founding Frontend Engineer - UniTok	Jun 2025 – Present
• Co-founded and played a key role in developing the frontend architecture and product experience of a university-focused social platform built with Flutter for Mobile app and Angular for the website. • Designed and implemented cross-platform user interfaces, delivering a consistent design system across mobile applications and web platforms. • Developed and maintained production-level web interfaces using Angular, building scalable component-based architectures. • Collaborated on UI/UX design, translating wireframes into clean, production-ready interfaces across mobile and web. • Designed and implemented complex Flutter UI components with pixel-level precision and high performance. • Architected the frontend structure to support modular scalability and future feature expansion. • Integrated RESTful APIs and managed frontend data flow while optimizing state management for smooth user experiences. • Collaborated with backend engineers to align system architecture with frontend performance and user interaction goals. • Contributed to feature design decisions and user experience improvements as part of the founding engineering team. • Managed iOS build processes and deployment pipelines, ensuring production-readiness across platforms.	
ERP Systems Trainee - iLines Solutions (Riyadh)	Jun 2025 – Aug 2025
• Developed a custom Odoo module by designing application models and implementing core business logic using Python. • Defined relational data models with Many2one, One2many, and Many2many relationships. • Built XML-based user interfaces including Form and Tree views and configured menus. • Configured module structure and security access rules within the Odoo framework. • Set up and configured the Odoo development environment using Docker and Ubuntu. • Collaborated with engineers to implement and test ERP features and resolve system issues.	
Full-Stack Web Developer - Freelance Laravel Project	Oct 2025 – Present
• Developed a full-stack web application using Laravel, implementing backend logic and responsive frontend interfaces. • Built a role-based management system with administrative dashboards and dynamic user pages. • Implemented secure file upload and document management features within the platform. • Integrated payment gateways including Mada, Tamara, and Tabby. • Configured database integration and deployed the application to a production hosting environment. • Implemented email notifications, activity logs, and core system features to support user workflows.	

TECHNICAL EXPERIENCE

Frontend Engineering & UI Architecture

- Designed scalable mobile and web interfaces using Flutter, HTML, CSS, and JavaScript.
- Built responsive and adaptive layouts using Tailwind CSS and Bootstrap.
- Architected reusable UI components and modular frontend structures.
- Integrated and handled RESTful APIs with clean state management.
- Optimized UI rendering performance and user interaction flow.
- Used Git for version control and collaborative development in Agile teams.

Product & System-Level Development

- Contributed to building structured backend-connected systems with secure authentication flows and role-based access logic.
- Worked on document processing, validation pipelines, and workflow-based systems requiring structured data handling.
- Participated in system design decisions involving modular architecture and scalability planning.

DESIGN EXPERTISE

- Strong background in UI/UX design and product aesthetics.
- Experienced in designing user flows, wireframes, and clean interface systems before implementation.
- Skilled in translating visual concepts into scalable frontend architecture.
- Detail-oriented with a strong sense of spacing, hierarchy, typography, and modern design standards.
- Experienced in Figma-based UI prototyping and visual system structuring.

CERTIFICATES

- PCAP – Python Programming, Cisco Networking Academy (2021)
- Java Fundamentals, Oracle Academy (2022)
- Network Essentials, Cisco Networking Academy (2024)
- Fundamentals of Reinforcement Learning – University of Alberta (2024)

LANGUAGES AND TECHNOLOGIES

- **Programming Languages:** JavaScript, Python, Java, HTML, CSS, XML
- **Technologies & Frameworks:** Flutter, Laravel, Angular, REST APIs, Tailwind CSS, Bootstrap, Git, Odoo ERP, React
- **Tools:** Figma, Docker, pgAdmin, Postman, Lucidchart, Jira
- **Concepts & Practices:** UI Architecture, Modular Frontend Design, REST Integration, Agile Product Development, Secure Workflow Systems
- **Languages:** Arabic (Native), English (Advanced)
